May 17th, 20XX

Dear Program Director,

It is my pleasure to write in strong support of Johnathan Jones' internal medicine residency application. As an internist and clinical faculty member at the Residency Experts Medical Center, my responsibilities include working with students in a clinical capacity. In 20XX, Johnathan completed his medical residency training under my supervision. During our initial conversations, he displayed a level of confidence and dedication that set him apart from other students in his cohort. As his rotation progressed, I was impressed with Johnathan's exemplary performance and found him to be an attentive clinician with a strong dedication to patient care.

During his rotation, Johnathan demonstrated a keen interest in learning about internal medicine. I observed him taking detailed patient histories, expressing genuine concern regarding patients' symptoms, and consistently taking a holistic approach. He also involved patients' family members and managed their expectations well. I was most impressed by Johnathan's determination to build trust with patients and found that patients' well-being was his number one priority. He has a humble and unassuming character, which was well-received by patients and staff alike.

Beyond direct patient care, Johnathan excelled in his diagnostic aspects of his rotation. His clinical notes were highly detailed, and he gave a compelling clinical explanation on the importance of test care and attention to an elderly diabetic patient. He also completed abnormal lab studies including lipid profiles and urinalyses, subsequently developing a list of differential diagnosis, informed treatment recommendations, and follow-up lab studies.

Collaboration and teamwork are important aspects of internal medicine, and Johnathan showed that he possessed the ability to both lead and support his colleagues. Furthermore, he demonstrated creative communication skills with patients and peers and got along well with nurses as well as medical and administrative staff. Overall, I found Johnathan professional, a eager learner, and very receptive to constructive criticism, which is a wonderful combination of traits that will help him succeed in an internal medicine residency.

I urge you to seriously consider Johnathan Jones' internal medicine residency application. He is a strong candidate in all regards and easily one of the top 5 students I have worked with in the last 10 years. He is meticulous in his work, takes responsibility for his actions, and would certainly be a valuable team member. I believe Johnathan has the potential to be a competent internist who is able to earn the trust and respect of his patients and colleagues. I highly recommend him without any reservations.

If you have any questions or would like to speak about Johnathan in greater detail, please do not hesitate to contact me directly.

Sincerely,

Janelle Cooper
